Rockville, MD
(202) 599-5341
tadde2018@gmail.com

Results-driven Data Analyst and ETL Developer with over 6 years of experience in data processing and analytics. Expert in developing robust Data Pipelines and performing complex Data Mapping to transform raw data into actionable insights within the healthcare and insurance sectors. Proven track record in Troubleshooting production issues and performing Root Cause Analysis to maintain 100% reliability in high-volume ETL workflows.

WORK EXPERIENCE

RIVERSIDE INSIGHT

Remote

SQL developer /Data Analyst

July 2021 – Present

- Develop and maintain scalable Data Pipelines using T-SQL to transform raw datasets into actionable insights for decision-making.
- Perform Root Cause Analysis on production server issues to resolve failed loads and ensure data consistency across healthcare reporting environments.
- Manage end-to-end Data Processing workflows, utilizing SQL Server Profiler for performance tuning and optimization of complex report queries.
- Validate data integrity through the creation of advanced schema objects and stored procedures to maintain strict Referential Integrity and data quality.
- Create automated Power BI dashboards and ad hoc reports, employing DAX to monitor KPIs and optimize business costs.
- Troubleshoot backend data mismatches and coordinate fixes within an Agile team environment using Jira for ticket management.

SAEBO INSURANCE/EBENEZER CORPORATION

MD

SQL developer

March 2020 – July 2021

- Developed complex ETL processes to extract data from diverse inputs, ensuring seamless integration into OLAP Data Warehousing environments.
- Executed precise Data Mapping and Data Validation rules to confirm accuracy and eliminate data mismatches for downstream analytics teams.
- Designed logical and physical data models to support healthcare data analytics and long-term data storage strategies.
- Implemented Row Level Security (RLS) and application security layer models in Power BI to protect sensitive member data.
- Maintained database availability through rigorous daily routine backups, ensuring zero data loss during production site onboarding.
- Translated complex business logic into efficient T-SQL scripts and user-defined functions to automate site onboarding processes.

NANO INSURANCE

Rockville, MD

BI Developer

March 2018 – December 2019

- Engineered SSIS packages to automate the extraction and transformation of data from CSV and Excel sources into structured Data Pipelines.
- Troubleshot and resolved database performance bottlenecks through proactive index tuning and efficient problem identification.
- Extracted data from heterogeneous sources and transferred it to OLAP systems using SSIS 2012 to support large-scale Data Processing.
- Created complex stored procedures and triggers to automate data validation and maintain system reliability across reporting environments.
- Managed automated job alerts to monitor the success of scheduled ETL workflows, reducing manual intervention in site onboarding.

- Designed matrix and tabular reports in SSRS with drill-down functionality to enhance data discovery for business stakeholders.

EDUCATION

STRAYER UNIVERSITY

Bachelor of Science in Information Technology,
GPA: 3.889, medal award and highest score

Washington, DC

September 2014 – December 2020

ADDITIONAL SKILLS

Data Engineering & ETL: ETL, Data Pipeline, Data Mapping, Data Processing, Data Warehousing, SSIS, Azure Data Factory, ETL/ELT process, Data Migration

Technical Development: SQL, T-SQL, Python, PySpark, Spark SQL, Databricks, DDL/DML/DCL, Stored Procedures, Performance Tuning

Analytics & Visualization: Data Analytics, Power BI, DAX, SSRS, Power Query, Data Modeling, Visualization

Methodologies & Operations: Troubleshooting, Data Validation, Root Cause Analysis, Agile, Jira, Data Security, Docker

ACCOMPLISHMENTS

- I optimized the complex stored procedure using different technique like rewrite again, by created missing index and by changed hash aggregate to stream aggregate. Finally, I saved my company memory and reduced execution time from 1hr to 2minute.
- I have finished my bachelor's degree with medal award and highest score 3.889. By December 12, 2020, from strayer university.
